New Energy Battery Cabinet Replacement Requirements

Overview

What are the customer requirements for a battery energy storage system?

Any customer obligations required for the battery energy storage system to be installed/operated such as maintaining an internet connection for remote monitoring of system performance or ensuring unobstructed access to the battery energy storage system for emergency situations. A copy of the product brochure/data sheet.

How should battery energy storage system specifications be based on technical specifications?

Battery energy storage system specifications should be based on technical specification as stated in the manufacturer documentation. Compare site energy generation (if applicable), and energy usage patterns to show the impact of the battery energy storage system on customer energy usage. The impact may include but is not limited to:.

How do I certify a battery energy storage system?

Provide a hardcopy and electronic copy of the battery energy storage system SDS. Provide a copy of NETCC consumer information guide. Provide customer with the name and licence/accreditation number of the tradesperson who designed/signed off on the installation.

Do I need a battery rack/cabinet?

Battery rack/cabinet (if battery modules or Pre-assembled battery system requires external battery racks/cabinets for mechanical mounting/protection).

Can a battery energy storage system be installed in Australia?

Any upgrades to existing site electrical infrastructure required to install proposed battery energy storage system. All components of the system should be suitable for installation under Australian legislation and Standards.

How can a battery energy storage system reduce reliability on the grid?

Reduce reliability on the grid: When the battery energy storage system is fully charged, how many loads can be supplied by the energy storage system when it is fully charged for a set period of time.
