New solar panel prices in East Africa

Overview

The declining cost of solar PV and batteries, along with a strong business case to combine solar and storage into one project, is a robust driver of large-scale solar deployment across Africa.

The declining cost of solar PV and batteries, along with a strong business case to combine solar and storage into one project, is a robust driver of large-scale solar deployment across Africa.

New research suggests that emerging markets in Africa, outside of SA and Egypt, will install an additional 23GW of solar PV by 2028. Image: Solar panels on the roof of a main street shop in the town of Napier, Western Cape in South Africa. Source: dpreezg©123rf Around 2,402MW of solar PV was.

The rise happened across Africa. 20 countries set a new record for the imports of solar panels in the 12 months to June 2025. 25 countries imported at least 100 MW, up from 15 countries 12 months before. These solar panels will provide a lot of electricity. The solar panels imported into Sierra.

The Chinese solar panel export data gives valuable insights because it includes imports up to June 2025, at a monthly granularity, and for every country in the world. The data can be found in Ember's China Solar Export Explorer. It is sourced from the General Administration of Customs of the.

The Africa Market Outlook for Solar PV 2025-2028 provides an in-depth analysis of the region's solar growth, investment landscape, and policy frameworks. The report examines key markets, highlights emerging opportunities, and outlines the financial and regulatory measures necessary to scale up.

In 2009, when I first traveled to South Africa for Scatec Solar to develop the market for solar PV, the price of a solar panel was \$2,2 per watt. In the 12 years to 2021, we saw a remarkable solar revolution: The cost of the PV panel fell to about \$ 0,20-0,25 per watt, driven by an unprecedented.

AFSIA's annual Africa Solar Outlook report is the most complete review of the

status of solar in Africa, country by country. Each country is presented through different angles: national solar and renewable energy objectives, current grid tariffs per customer segment, installed PV capacity per.
