Wärtsilä Corporation, Trade press release, 22 May 2025 at 9 AM EEST
Technology group Wärtsilä will supply power generation equipment for a new 30 MW power plant being set up on Victoria Island in Lagos by a Nigerian independent power producer (IPP). Wärtsilä will also operate and maintain the power.

A landmark installation in Banana Island, Lagos, Nigeria combines two ESS-GRID HV PACK systems and a 50kW Deye inverter, totaling 110kWh of commercial battery storage systems. The setup supports both residential and commercial loads with clean, continuous power, powered by a 44kWp PV system. This.

Aed Energy, a UK-based developer of next-generation thermal energy storage, has announced a new pilot project at Pan-Atlantic University (PAU) in Lagos, Nigeria, as part of ZE-Gen's international innovation programme. Advancing practical solutions to displace fossil fuel generators, the programme.

The Nigeria Renewable Energy Storage System is a distributed lithium battery energy storage solution designed to provide reliable and sustainable power for self-consumption and backup needs. Given Nigeria's frequent grid instability, this system ensures a continuous power supply, reducing.
