

A-Core Container

Nordic mobile energy storage power supply manufacturer

Overview

What does Nordic batteries do?

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. At Nordic Batteries we focus on what is important: safety, reliability and performance.

Are Nordic batteries looking for a development engineer?

Nordic Batteries are seeking a development engineer for mechanical construction and system design. Factor 47 is operative! The pilot line where Nordic Batteries will produce their first battery modules is now officially open after the visit from former Prime Minister Erna Solberg where she cut the banner to kick it off.

Does Sweden have a sustainable power supply industry?

In Sweden, the power supply industry is characterized by a strong focus on sustainability and renewable energy sources. The country aims to transition to a carbon-neutral economy by 2045, making it essential for companies in this sector to align with environmental regulations and government policies promoting green energy.

Why should you choose a power supply company in Sweden?

They provide comprehensive project management services and ensure quality testing, making them a reliable partner for power supply solutions. In Sweden, the power supply industry is characterized by a strong focus on sustainability and renewable energy sources.

Where are battery energy storage systems made?

We design and manufacture our battery energy storage systems in Finland, including the Power Conversion System (PCS), bi-directional inverters, system-level controls, and the Energy Management System (EMS). Only the batteries

are sourced externally. This gives us full control over quality, integration and reliability. 2.
