Norway s new solar power station generates electricity

Overview

Norway's Furuseth Solkraftverk, the first large-scale solar park, is now live and generating electricity over 200 hectares in Stor-Elvdal.

Norway's Furuseth Solkraftverk, the first large-scale solar park, is now live and generating electricity over 200 hectares in Stor-Elvdal.

Pareto Solar Fund AS ("PSF"), managed by Pareto Alternative Investments AS, is set to establish Norway's largest solar power plant, with a total installed capacity of over 7,500 kWp. This state-of-the-art facility will generate more than 6 million kWh of renewable energy annually, equivalent to the.

Solgrid has recently connected Norway's first large-scale solar power plant, Furuseth Solar Power Plant in Stor-Elvdal, to the electricity grid. This facility is important not only for the country's energy mix but also for local economic development through job creation and revenue, with the.

Norway has the highest share of electricity produced from renewable sources in Europe, and the lowest emissions from the power sector. At the beginning of 2025, Norway's power supply had an installed production capacity of 40 334 MW, with an estimated normal annual production of around 157 TWh. The.

Energeia, a Norwegian solar developer, has been granted a 46 MWp solar concession, making it the largest in Norway to date. This significant milestone comes as part of the Norwegian Water Resources and Energy Directorate's (NVE) first round of solar concessions, marking a key development in the.

The solar park Furuseth in Stor-Elvdal, Norway, uses bifacial modules. The first part of Furuseth Solkraftverk in Stor-Elvdal, Norway's first large-scale solar power plant, was recently connected to the grid and is now producing electricity on an area of around 200 hectares. The developer is.

Norway is a heavy producer of renewable energy because of hydropower. Around 88% of electricity production in Norway is from 1971 hydropower plants with a combined production capacity of over 40 GW (87 TWh reservoir

capacity, storing water from summer to winter). Normal annual hydropower energy.
