Outdoor power charging cost

Overview

Are EV recharging costs influenced by costs?

Electric vehicle (EV) purchasing decisions are significantly influenced by costs. Focusing on China, this research comprehensively examines the levelized costs of EV recharging (including charging and swapping) at the provincial level considering various factors, including charging locations, time of charging, and power levels.

How much power does a charging station need?

At the same time, all the charging stations need a peak power supply of $8 \eta P Q s$ with a 100% station load, that is 1.61×10^5 kW. In 2009, Beijing totally consumed 7.39×10^{10} kWh electricity energy and the peak power in the history of Beijing was 1.6×10^7 kW, occurring at 11 AM, July 29, 2010 .

Is there a reasonable charging price for electric vehicles in China?

The number of electric vehicles in China is expected to grow rapidly, triggering the nationwide large-scale construction of charging stations. At the same time, a reasonable charging price has not been established. This article records the views of station operators and EV users and calculates a charging pricing range.

What is a standard charging station?

A 'standard charging station' is designed in accordance with national standards, has eight chargers of constant charging power and is open daily from 6:00 to 22:00. A 'standard EV' is equipped with power batteries having an average energy of the various types of EV on the market.

Who uses charging stations?

The main users of charging stations are electric public buses involved in demonstration projects, postal or sanitation municipal vehicles, engineering vehicles from electric power enterprises, and some shuttle buses in particular

venues. No clear charging price has yet been established.

Can charging stations make profit?

Based on current energy prices and battery costs, charging stations are unable to make profit, and the pricing shortfall is up to 0.78 RMB yuan (kWh) –1. Only with a 25% increase in energy price or 25% reduction in battery cost can charging stations become profitable. Several suggestions are proposed to improve station profits.
