Overview

Could new solar power innovations change the way we think about energy?

Here are ten new solar power innovations that could change the way we think about energy. While some of these ideas have been around for a couple of years, they've had significant recent breakthroughs that suggest they'll offer more solar power options in 2025. Solar panels don't just belong on rooftops.

Will there be more solar power options in 2025?

While some of these ideas have been around for a couple of years, they've had significant recent breakthroughs that suggest they'll offer more solar power options in 2025. Solar panels don't just belong on rooftops. Some of the biggest breakthroughs in solar energy are happening on the water.

Will space-based solar power be a reality in 2025?

The European Space Agency (ESA) and NASA are investing in research to make space-based solar a reality. And Space.com reports that Japan will start beaming solar energy to earth this year — in 2025! Last fall, CBC News reported that Iceland hopes to add space solar power to its renewable energy sources by 2030.

Is solar power a good idea for people living off the grid?

Solar power isn't just a cool idea for people living off the grid. It's what keeps the lights on and the water pump running. We spent years relying on solar panels to power my off-grid home and watched the technology change fast. In fact, we are now on our third off grid solar power system.

Are solar windows a good idea for off-grid homes?

For off grid homes like ours which runs various power systems (including our boiler system and custom water pump system), this could be huge. If you're low on roof space, solar windows could help you maximize every inch of your property. Now, I know this is one of the solar power innovations that sounds

like science fiction, but it isn't.

Is solar power a good idea?

Today, there are all kinds of solar power innovations and new technologies to harness the sun's power, not to mention the new solar products. Solar power isn't just a cool idea for people living off the grid. It's what keeps the lights on and the water pump running.
