Pack battery IP32

Overview

Does a battery pack need a high IP rating?

In general, a battery pack used in an indoors, maybe in a factory environment would not require a high IP rating, whereas a battery pack used in an outdoor or harsh environment may require a higher IP rating.

What is an IP rating on a battery?

The IP rating given to a battery allows you to know what level of protection your battery has against both liquid and solid objects. These ratings offer a more detailed and useful set of information that can help far more than ambiguous terms like waterproof.

What is a battery pack?

They may be configured in series, parallel or a mixture of both to deliver the desired voltage, capacity, or power density. Packs are identified by cell size, number of cells, battery structure, chemistry, chargeability, capacity, and voltage rating. Lithium-Ion Battery Products - Battery Packs are in stock at Digikey.

How do I know if my battery is IP rated?

You can find out what your battery IP rating is by checking the data sheet provided by the battery manufacturer. Have Questions About Which IP Rating Your Battery Needs?

Looking for a battery that can withstand the tough conditions you need to put it through but are not sure where to start?

How do you use a battery pack?

To pick up a draggable item, press the space bar. While dragging, use the

arrow keys to move the item. Press space again to drop the item in its new position, or press escape to cancel. A battery pack is a set of any number of battery cells connected and bound together to form a single unit with a specific configuration and dimensions.
