Pack battery pack 350VAC

Overview

How many power outlets does a bk350 battery backup have?

The BK350 UPS battery backup features a total of six power outlets, all of which shield your devices against dangerous surges and spikes in voltage. Three of these are UPS battery backup outlets to protect critical devices like computer and home networking equipment. APC PowerChute Personal Edition power and energy management software is included.

What is the WattBox UPS 350?

The WattBox UPS 350 is a 350VA standby UPS that maintains connectivity of networks and IoT devices, security systems, and more during power outages. It gives you and your customers time to save their data and send alerts. Unexpected power outages often result in hours of lost work and costly equipment damage.

What is a UPS 350?

The UPS 350 is a standby UPS (Uninterruptible Power Supply) and battery pack with a compact size. It serves as a simple desk-side backup to ensure critical files can be saved despite power issues. It is also compatible with multiple IP WattBox products, providing peace of mind to customers by ensuring their work and equipment is safe during unpredictable power interruptions.

What is APC battery backup power supply?

APC will repair or replace attached equipment that sustains surge-related damage while properly connected to a registered Back-UPS uninterruptible power supply unit. This APC battery backup power supply offers guaranteed power and surge protection for wireless networks, computers, and other small electronics in your home or business.

Does the UPS 350 have OvrC?

When you pair the UPS 350 with a 300-, 700-, or 800-Series IP WattBox, you unlock the power of OvrC, giving you additional features like load shedding, remote alarm silencing, and battery health alerts.
