There is no one-size-fits-all battery suitable for every vehicle. When it's time for a new one, consider battery freshness, type, physical size, terminal locations, electrical specifications and warranty before you buy. Most cars use conventional flooded lead-acid batteries, but increasing numbers.

We have a 30,000 SqFt warehouse and two battery assembling lines in Richmond, California. At BatterySpace, we provide all your needs for custom batteries. We carry a full line of different kinds of batteries, as well as top brand batteries in our US warehouse. PCB/PCM/BMS: From 1 cell to 24 cells.

Although we carry an incredible inventory of battery packs for nearly every application, we know that sometimes there is a need for a custom application or a pack built to specification. This application will allow you to quote and order those custom packs. Follow the quick 5 step process to design.

With our customized battery pack solutions, we can help you from a design stage through production. With over 50 years of experience in the battery and battery-charger industry, our engineering team can support all your needs. All our battery pack products are custom engineered to fit your end.

We carry a number of rechargeable lithium ion battery packs. These battery

packs are light-weight, eco-friendly, provide long battery life, and are fully PCB protected. All of these packs are made with UL1642 compliant 18650 cells, meaning they have gone through rigorous testing to ensure they safe.

When we look at the BloombergNEF battery chart we see a decreasing pack price, but is the Pack to Cell Cost Ratio changing?

BloombergNEF chart [1]. Note: historical prices have been updated to reflect real 2024 dollars. Weighted average survey value includes 343 data points from passenger cars.
