Philippines new energy project with energy storage

Overview

President Ferdinand R. Marcos Jr. on Thursday led the groundbreaking of the “Meralco Terra Solar Project,” considered as the largest integrated solar and battery storage facility in the world.

President Ferdinand R. Marcos Jr. on Thursday led the groundbreaking of the “Meralco Terra Solar Project,” considered as the largest integrated solar and battery storage facility in the world.

On October 23, 2025, China Energy Engineering Corporation (China Energy) signed the EPC contract for the South Block of the MTerra Solar project with Terra Solar Philippines, Inc. (TSPI). The contract covers 1,050 MWp of photovoltaic capacity and a 1.2 GWh energy storage system. Specifically: The.

President Ferdinand R. Marcos Jr. on Thursday led the groundbreaking of the “Meralco Terra Solar Project,” considered as the largest integrated solar and battery storage facility in the world. In his speech during the ceremony in Gapan City, Nueva Ecija, President Marcos highlighted the importance.

In a strategic move valued at approximately \$21 million, Aboitiz Power is integrating BESS technology into its existing thermal plants, a model for clean energy that is being closely watched by national utilities as a blueprint for climate-resilient infrastructure. The groundbreaking for.

The Philippine Energy Regulatory Commission (ERC) recently approved a P14.25-billion (\$250 million) transmission network that will connect the MTerra Solar Project to the national grid. The decision allows Terra Solar Philippines Inc. to finish work on the high-voltage lines, which the company says.

Solar & Storage Live Philippines 2025 is set to be a pivotal event, spotlighting the latest advancements in solar energy and battery storage technology. The prestigious gathering will bring together industry leaders, innovators, and key stakeholders to explore transformative developments in the.

Recently, the MTerra Solar project, the largest solar energy storage project in

the Philippines, has officially received grid access approval from the Philippine Energy Regulatory Commission (ERC). The total installed capacity of the project is a 3.5GW photovoltaic power station, equipped with a.
