# Poland solar energy storage villa subsidies

## Overview

---

The application for the sixth phase of Poland's "Mój Prąd" (My Electricity) rebate program began earlier this month, offering a total subsidy of PLN 400 million (approximately CNY 738 million) for residential photovoltaic (PV), battery storage, and hot water storage systems. What is Poland's energy storage subsidy?

Learn about Poland's €1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.

How much subsidy is available for solar installations?

The maximum subsidy available for solar without storage is PLN 6,000, increasing to PLN 7,000 for solar micro-installations with storage. Any solar installations connecting to the grid after Aug. 1 must be paired with electric storage facilities and/or heat storage facilities to be eligible. The installations can range from 2 kW to 20 kW in size.

Why should Poland invest in energy storage?

Development of energy production and consumption forecasting systems. Energy storage subsidy programs support the transformation of Poland's electricity grid into a more flexible and resilient system. Investments in storage facilities enable better integration of RES, improve grid stability and enhance the country's energy security.

How many photovoltaic micro-installations are there in Poland?

Since its inception, the "My Electricity" program has funded over 530,000 photovoltaic (PV) micro-installations across Poland, significantly contributing to the nation's renewable energy goals. 1□ For PV micro-installations registered by July 31, 2024, energy or heat storage systems are optional but encouraged.

How much money does Poland spend on battery energy storage?

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately €1 billion).

What are the requirements for a photovoltaic system in Poland?

6□Balcony PV sets. 7□Other devices approved for use in Poland. All photovoltaic installations must be connected to the national power grid. The capacity of the energy storage systems funded under the program must be at least 1.5 times the peak power (kWp) of the PV installation.
