Portable energy storage battery module

Overview

What is Eforce stackable energy storage system?

Pairing powerful 9.6 kWh LFP batteries with the Envy Inverter, eForce delivers a flexible, stackable solution for backup power, off-grid living, and energy independence. The eForce Stackable Energy Storage System is Fortress Power's most advanced and scalable solution for whole-home backup, off-grid living, and solar self-consumption.

How long do LiFePO4 batteries last?

Our Lithium Iron Phosphate (LiFePO4) batteries have a lifespan of over 6500 cycles, equivalent to 10-15 years of regular usage, backed by a 10-year warranty, depending on the model.

How many Eforce modules can be stacked?

Engineered for flexibility, eForce modules can be stacked vertically (up to 3 modules) using wireless quick-connect plugs — no cables required — or expanded laterally for systems up to 268.8 kWh. Each stack integrates with the eWay, a smart wireway featuring built-in busbars, conduit ports, an emergency shutoff, and real-time LED status indicators.
