

## A-Core Container

# Portuguese greenhouse solar power generation energy storage cabinet

## Overview

---

Should energy storage be democratised in Portugal?

Energy storage is therefore essential if EU targets are to be met. Portugal's installed energy storage capacity is still predominantly based on hydro pumping, which currently stands at 4,164 GW year. However, this paradigm is about to change with the democratisation of energy storage solutions through wind and solar production.

Does Portugal need energy storage?

From ESS News Portugal is seeking to promote flexibility and balance its power system with energy storage as it continues to break records for solar energy production. To this end, the country's Ministry of Energy announced on Wednesday that it has allocated €99.75 million (\$107.6 million) in a bid to support 500 MW of energy storage projects.

How much will Portugal spend on energy storage & grid flexibility?

The Portuguese Ministry of Energy has allocated €99.75 million (\$107.6 million) for grid flexibility and energy storage projects which should be installed by the end of 2025. From ESS News Portugal is seeking to promote flexibility and balance its power system with energy storage as it continues to break records for solar energy production.

How many GWh of electricity are generated in Portugal in 2023?

Between 1 January and 31 October 2023, 35,152 GWh of electricity were generated on the Portuguese mainland, of which 67.8 per cent came from renewable sources. The storage will be decisive for the long-awaited energy transition.

Are solar parks a stand-alone asset in Portugal?

This shift illustrates a broader trend in the Portuguese renewable sector: the move from building capacity alone to ensuring stability, reliability, and

smarter integration of green energy into the grid. Solar parks are no longer seen as stand-alone assets.
