Price of solar power station panels

SOLAR PRO.

Overview

The average 6-kW residential solar panel installation is $17,852 before incentives. Learn about cost factors, financing options, tax breaks and more.

The average 6-kW residential solar panel installation is $17,852 before incentives. Learn about cost factors, financing options, tax breaks and more.

Solar panels generate "free" electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs $28,241 in 2025. That price effectively drops to $19,873 after considering the full federal solar tax credit.

Solar power system cost based on your location, roof, power usage, and current local offers. Last updated: October2025 As of 2025, the average cost of solar panels in New York is $3.30 per watt, making a typical 6.9 kilowatt (kW) solar system $16,632 after claiming the 30% federal solar tax credit.

Installing solar panels can be one of the most impactful improvements you can make - allowing you to take control of electricity bills, protect your home from outages and increase the value of your property while producing energy directly on the roof. How much does it cost to install and manage.
