Pvb double glass module manufacturer

Overview

What is a dual glass PV module?

The dual glass PV module is a kind of special glass that can be used to generate electricity by solar radiation. It is composed of low-iron glass, solar cells, film, back glass, and special metal wires. It seals the solar cell through a film between a piece of low-iron glass and a back glass, which is the most innovative high-tech for construction.

What is a glass-glass PV module?

Glass-Glass PV Module In the past and currently, the standard photovoltaic module has been manufactured using 3.2 -4mm glass on the front and a polymer-based insulating back she. ViaSolis is an international manufacturer of PV glass and provider of solar energy solutions. The company operates one of the most advanced production facilities in EU.

What is a double glass module?

Double glass module: the front and back two pieces of glass + photovoltaic cells are compounded by encapsulation film. Traditional double glass module package: EVA+EVA, EVA+POE, POE+POE. Jiaxing Fuying double glass module package: PVB+PVB.

What is Jiaxing Fuying double glass module package?

Jiaxing Fuying double glass module package: PVB+PVB. The life cycle is longer, the warranty for ordinary modules is 25 years, and the warranty for double glass modules is 35 years. The attenuation is low, the attenuation of the traditional module is about 0.7%, and the double glass module is 0.5%.
