Retractable solar panel price

Overview

Based on our 2025 survey of 1,000 solar customers, the national average price for a single solar panel professionally installed is \$1,200. This means most full-size systems of between 20 and 30 panels cost between \$24,000 and \$36,000. How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How long do solar panels last?

Solar panels typically pay for themselves within 5 to 15 years. Factors that influence the payback period include electrical costs, the size and efficiency of your solar system, local incentives and tax credits, sun exposure, net metering, energy consumption and maintenance costs. How much do solar panels cost for a 2,000-square-foot home?

.

How much does a solar inverter cost?

Inverter: A solar inverter converts the generated DC electricity into AC electricity that can be used to power your home. The cost of an inverter depends on its size and efficiency, but these devices typically cost between \$1,000 and \$3,000. **Mounting system:** This is what holds rooftop solar panels in place.

How much does a solar energy storage battery cost?

Solar batteries let you keep your lights on even when your local power grid is down. However, battery storage typically costs between \$7,000 and \$18,000. If you live in an area with frequent power outages, a solar energy storage battery is worth considering. Other equipment also factors into the overall

price:.

Are smartflower solar panels expensive?

Most of Smartflower's beautiful and unique sun-tracking solar sculptures aren't purchased by homeowners. Cost is a big reason. Smartflower solar panels unfurl in the morning and track the sun across the sky. In a world filled with countless rectangular solar panels, Smartflower is a rare, novel solar product.

Do solar panels save money on electricity?

It all depends on what your local utility charges for electricity, according to Robert Flores, a solar expert at The University of California, Irvine's Clean Energy Institute. Solar savings go the furthest in places with high electricity rates, like Connecticut, California and Hawaii.
