Romania s new energy storage industry

Overview

In an accelerated wave of investments, companies in Romania are combining battery energy storage systems (BESS) with solar, hydro or wind energy, or building independent storage facilities. The list includes big names such as Verbund, Engie R.Power, Hidroelectrica.

In an accelerated wave of investments, companies in Romania are combining battery energy storage systems (BESS) with solar, hydro or wind energy, or building independent storage facilities. The list includes big names such as Verbund, Engie R.Power, Hidroelectrica.

More and more large companies are announcing investments in batteries, storage is on its way to becoming a pillar of the country's new energy system - ENERGY WORLD - ROMANIA Energy storage fever has gripped Romania. More and more large companies are announcing investments in batteries, storage is.

Romania's Ministry of Energy has announced a €150 million funding program aimed at promoting the development of battery energy storage systems (BESS) across the country. The program, which will be financed through the Modernization Fund, is specifically targeting standalone storage facilities.

Romania expects its overall energy storage to amount to at least 2.5 GW in operating power at the end of 2025, and to expand to as much as 5 GW a year later, local media reported, citing Minister of Energy Sebastian Burduja. These ambitious energy storage targets are aligned with transmission.

Bucharest, July 22, 2025 - Nova Power & Gas, a Romanian energy company and part of the E-INFRA Group, announces the launch of the largest battery energy storage project in Romania. The installation, which will be built in Florești, Cluj County, will have a capacity of 200 MW / 400 MWh and is.

In a decisive move to support its clean energy transition, Romania has overhauled a key regulatory barrier holding back investment in energy storage. The National Energy Regulatory Authority (ANRE) announced on July

8 a new framework that eliminates the double taxation of electricity stored in.

Romania, located in the north-eastern part of Europe's Balkan Peninsula, is expected to be one of the fastest-growing countries in Europe's new energy market, thanks to its rich natural resources and optimising policy environment. Although it is lagging slightly behind other EU countries in terms.
