

A-Core Container

Romanian voltage-stabilizing inverter manufacturer

Overview

What is protector servo voltage stabilizer thyristor based voltage regulator?

Protector Servo Voltage Stabilizer Learn More Automatic voltage regulator to fix the electrical input with servo motors and variable transformers. Each phase is controlled separately. Recommended for heavy duty loads. Protector Static Voltage Stabilizer Thyristor based voltage regulator to fix the electrical input without any moving parts.

What is a thyristor based voltage stabilizer?

Protector Static Voltage Stabilizer Thyristor based voltage regulator to fix the electrical input without any moving parts. Each phase is controlled separately. Recommended for sensitive critical loads. Learn More True double conversion design online UPS is for commercial and industrial devices.

What are the different types of inverters?

Pure sine wave output, IGBT controlled inverters. Transformer based structure offers stability. Solid state power converter without moving parts and selectable input. Instantaneous transfer of two or more different power sources to the load. Thyristor or IGBT controlled, air, oil or water cooled plating rectifiers.

Who is ROM energy electronic systems?

ROM Energy Electronic Systems is a total solution provider to power electronics. We offer outstanding reliability, competitive pricing and exceptional service for over 30 years. Office Address: Kucukbakkalkoy Mah. Selvili Sk. 4/48 Atasehir Istanbul TURKEY Factory Address: Sefakoy Sanayi Sitesi 14. Blok No: 21 Basaksehir Istanbul TURKEY
