# Rural rooftop solar module prices

## Overview

---

Based on our 2025 survey of 1,000 solar customers, the national average price for a single solar panel professionally installed is \$1,200. This means most full-size systems of between 20 and 30 panels cost between \$24,000 and \$36,000.

Based on our 2025 survey of 1,000 solar customers, the national average price for a single solar panel professionally installed is \$1,200. This means most full-size systems of between 20 and 30 panels cost between \$24,000 and \$36,000.

Take control of your energy costs with solar power. Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873.

Understanding solar panel costs is a key step in deciding whether solar is the right investment for your home or business. Based on our 2025 survey of 1,000 solar customers, the national average price for a single solar panel professionally installed is \$1,200. This means most full-size systems of.

How much does it cost to install and manage solar panels?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. 1,2,12 This figure includes the solar panels, the installation, and other expenses. Using these numbers.

Solar power system cost based on your location, roof, power usage, and current local offers. Last updated: October 2025 As of 2025, the average cost of solar panels in New York is \$3.30 per watt, making a typical 6.9 kilowatt (kW) solar system \$16,632 after claiming the 30% federal solar tax credit.

Each year, the U.S. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.S. solar photovoltaic (PV) systems to develop cost benchmarks. These

benchmarks help measure progress toward goals for reducing solar electricity costs.
