An implementation agreement is in place between Serbia's Ministry of Mining and Energy, utility company Elektroprivreda Srbije (EPS) and a consortium of Hyundai Engineering and UGT Renewables for six new solar plants totalling 1 GW. Up to 200 MW of battery storage will be developed across the.

The Government of Serbia issued a decision to develop a special purpose spatial plan for a group of solar power plants of a total of 1 GW in connection capacity including battery energy storage systems of at least 200 MW in operating power. Hyundai Engineering and UGT Renewables were selected as.

The Serbian Government has approved the development of a spatial plan for constructing large-capacity self-balancing solar power plants paired with battery energy storage systems. This ambitious initiative will encompass areas in the cities of Zajecar and Leskovac, as well as the municipalities of.

Serbia has taken a bold step toward renewable energy with a newly signed agreement to build 1 GW of self-balancing solar power plants. This groundbreaking project, led by the Hyundai Engineering and UGT Renewables consortium, marks a significant shift in Serbia's energy strategy. Serbia aims to.

The upcoming unveiling of Serbia's largest solar power plant, located in Ada, will mark a significant milestone for Nofar Adria, a Belgrade-based company primarily owned by Israeli firm Nofar Energy. With a total capacity of 26

megawatts, this solar facility represents a substantial investment of.

Israel's Nofar Energy Ltd has connected its 27 MW Ada solar power plant in Serbia to the grid, the renewable energy development company announced. The investment worth 25 million euros (26.2 million dollars) was realized in Ada and consists of two solar parks. Nofar started the construction of the.
