WASHINGTON, June 30, 2025— The Republic of Seychelles is taking a major step toward a more sustainable and resilient energy future with the launch of the Seychelles Renewable Energy Acceleration Program (REAP), approved by the World Bank’s Board of Executive Directors on May 30, 2025. Over the next.

The Seychelles Government is committed to providing adequate, reliable and affordable energy to meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as.

The Seychelles has long faced challenges in its journey towards renewable energy, primarily due to limited land availability, suboptimal wind resources, and its reliance on Heavy Fuel Oil and diesel. This dependency has resulted in some of the highest electricity tariffs in the world, placing.

The Republic of Seychelles has inaugurated its second clean energy project, a 5MW solar PV plant with battery storage. The Ile de Romainville Solar Park was constructed on the same island wind turbines producing clean electricity in Victoria harbor, Mahe Island, Seychelles. Image:.

The Seychelles has long faced challenges in its journey towards renewable energy, primarily due to limited land availability, suboptimal wind resources, and its reliance on Heavy Fuel Oil and diesel. This dependency has resulted in

some of the highest electricity tariffs in the world, placing.

The financial rebate scheme launched in May 2014 has been put in place as an incentive to encourage residential or commercial premises to install grid tied PV systems on their roof top. The rebate scheme has been organized by the Seychelles government in collaboration with the United Nations. What is the Seychelles energy plan?

It targets an ambitious transformation and diversification of the Seychelles' currently 85 MW diesel-dominated electricity generation capacity (on Mahé, Praslin and La Digue), aiming at replacing diesel generators with domestic and international public and private financing.

What does the Seychelles government do?

The Seychelles Government is committed to providing adequate, reliable and affordable energy to meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as wind and solar.

Does Seychelles have a 5MW solar PV plant?

The Republic of Seychelles has inaugurated its second clean energy project, a 5MW solar PV plant with battery storage. The Republic of Seychelles has inaugurated its second clean energy project, a 5MW solar PV plant with battery storage.

How much energy will the Seychelles save a year?

This system helps increase the resilience of the national grid of the Seychelles. It is estimated that the project will save approximately 2 million liters of fuel annually and offset 6,000 tonnes of carbon dioxide. Have you read?

.

Where are the solar power plants located in the Seychelles?

The facilities include the 5MW solar PV plant located in Ile de Romainville, a 3.3 MWh energy storage system located on Mahé and a 33kV system that allows for the safe and stable supply of electricity from the PV power plant to the main island of Mahé. This system helps increase the resilience of the

national grid of the Seychelles.

What is the SME loan in Seychelles?

Finance has been made available through a loan facility to encourage residential users to adopt the use of energy efficient devices and renewable energy. The SME Loan is an financial incentive for the commercial sector. It is an agreement between the Government of Seychelles and the Commercial Banks.
