Solar Sun Room Purchase

Overview

What is the cost of a sunroom?

A sunroom costs between \$35,000 and \$70,000. Most sunroom installers do three-season and four-season rooms, but always ask your preferred professional to be sure.

Where can I buy a sunroom kit?

Sunroom kits are often available for purchase from most garden centers. However, these kits are generally mass-produced, and not customized. Instead, an architectural firm may be able to provide you with all the materials you need to build your sunroom.

Does a sunroom increase resale value?

Energy Efficiency: Modern sunrooms feature insulated windows and walls to reduce energy loss. □ Increase in Home Value: A well-built four-season sunroom can add \$20,000 - \$50,000 to your home's resale value.

Is a four-season sunroom a good investment?

A four-season sunroom is more than just an extra room—it's an investment in your home and lifestyle. Many homeowners struggle with the uncertainty of sunroom costs, but breaking it down into materials, labor, and additional expenses makes it easier to budget.

How much does it cost to build a sun room?

In my case, converting a sun room in Perth into a proper room costs around \$50k. This includes rejigging roof lines, as the current sun room has a deadly box gutter and is just an enclosed patio. At least it has a concrete poured floor, and once the frame is up, roof is up, and cladding is done.

Does JSB home solutions build a sunroom?

At JSB Home Solutions, we specialize in building high-quality vinyl four-season sunrooms designed for year-round comfort. If you're ready to take the next step, download our Sunroom Addition Planning Workbook to help you map out your project.
