# Solar panel usage percentage

## Overview

---

As of 2024, approximately 3% of American households have installed solar panels, according to recent industry reports. This figure highlights a significant yet modest adoption of solar energy across the United States.

As of 2024, approximately 3% of American households have installed solar panels, according to recent industry reports. This figure highlights a significant yet modest adoption of solar energy across the United States.

In the last decade, solar has grown with an average annual rate of 26 percent, reaching a capacity of over 138 gigawatts in 2023. In that same year, solar energy accounted for 55 percent of new electricity-generating capacity additions in the North American country. Of the total solar capacity.

According to our Electric Power Annual, solar power accounted for 3% of U.S. electricity generation from all sources in 2020. In our Short-Term Energy Outlook, we forecast that solar will account for 4% of U.S. electricity generation in 2021 and 5% in 2022. In our Annual Energy Outlook 2021.

Solar power has been growing rapidly in the U.S. for the past decade, and there are now more than 160 gigawatts of solar panels installed across the country. Here are some quick statistics about solar energy in the United States: Note: Data from U.S. Energy Information Administration, October 2024.

Ember (2025); Energy Institute - Statistical Review of World Energy (2025) - with major processing by Our World in Data This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over European countries. You can find more about Ember's methodology in this.

As of 2024, approximately 3% of American households have installed solar panels, according to recent industry reports. This figure highlights a significant yet modest adoption of solar energy across the United States. With the growing emphasis on renewable energy sources, understanding the current.

This section has rounded up all the statistics related to solar panels, their

electricity production capacity, and their usage across the U.S. These are the numbers that matter, so make sure to give them a good look! As solar panels became popular across the U.S., it was inevitably followed by a.
