Solar power generation from solar panels in Yaoundé

Overview

Could Yaounde City Council invest in solar energy?

The investment indicators for this project are quite bankable that the Yaounde City Council, with the recent decentralization of municipalities, could source partnership agreement with the Rural Electrification Agency in lobbying solar energy investors to set up this project which could be used as an additional source of income for the council.

How much solar radiation does Yaounde have?

Yaounde has an annual solar radiation of 4.69 kWh/m²/d where the month of July had the least average solar radiation and January has the highest solar radiation. Table 2. Average monthly solar PV electricity exported to the grid

3.1. Electricity generation.

Can a solar PV power plant be built in Cameroon?

In line with this goal, the study assesses the feasibility of a 211.75 MW solar PV power plant in Yaounde, Cameroon using RETScreen Expert. The simulation showed an annual electricity production of 304,668.191 MWh with arrays mounted on a fixed axis.

Are solar energy systems a sustainable solution in Cameroon?

In Cameroon, where energy demands are growing rapidly alongside economic development, solar energy systems offer a sustainable and efficient solution to meet the country's energy needs.

Who is African solar generation?

African Solar Generation (ASG) is a Swiss-Cameroonian solar company based in Yaoundé, Cameroon. The company's vision is to combat energy poverty in Cameroon at all levels – from lighting for families to supplying electricity to businesses, administrations, farms, International Organizations, schools and many more.

Is a grid-connected solar PV project viable in Cameroon?

Conclusions A detailed feasibility analysis of a 211.75 MW grid-connected solar PV was conducted in order to assess the project's viability in Cameroon through examining the risk, technical, sensitivity, financial and the environmental impact on Cameroon.
