Southern Europe s new energy storage policy

Overview

Is the battery storage age just beginning in Europe?

Walburga Hemetsberger, CEO of SolarPower Europe (she/her), said: “If Europe has already entered the solar age, the battery storage age is just beginning. With solar energy mainstreaming across the continent, now is the time for European decisionmakers to put batteries at the centre of a flexible, electrified, energy system.

Are regulatory hurdles affecting energy storage projects in Europe?

Simple regulatory hurdles hamper the growth of energy storage projects across Europe. When these hurdles do not also apply to fossil generators, they even put energy storage at a competitive disadvantage. This practice imposes undue financial burdens to energy storage projects.

Why is battery storage so important in Europe?

Markus Elsaesser, the CEO of Solar Promotion GmbH (he/him), said: “Europe’s solar success has laid the foundation – now battery storage is stepping into its pivotal role. With solar power surging across the continent, the need for flexible capacity has never been clearer, and batteries are ready to deliver.
