Sri Lanka Communication Base Station Wind Power House

Overview

Sri Lanka's electricity demand is currently met by nine thermal power stations, fifteen large hydroelectric power stations, and fifteen wind farms, with a smaller share from small hydro facilities and other renewables such as solar. Most hydroelectric and thermal/fossil fuel-based power stations in the country are owned and/or operated by the government via the state-run Ceylon Electricity. Non-renewableAs of 2015, 1,464 MW of the total thermal installed capacity was from state-owned power stations: 900 MW from , 380 MW from the state-owned portion of , 160 MW from .

Hydroelectricity has played a very significant role in the national installed power capacity since it was introduced in the 1950s, with over 50% of the total grid capacity met by in 2000-2010.
