Stand-up pack battery

Overview

What is a rechargeable battery pack?

This portable rechargeable battery pack consists of a 60 watt hour lithium ion battery assembly and two DC/DC converters. The first DC converter allows the pack to be charged with a wide range of voltage inputs. The second allows the pack to deliver a user settable voltage to run equipment requiring 5volts to 19+volts.

How do I charge my arkpak battery?

Simply plug your ArkPak into the mains power socket at home and ArkPak's built in charger will recharge most 12V batteries (up to 130ah / Group 31) overnight in 12-16 hours. Plus when you are not using it, leave your ArkPak plugged in so that the battery receives a constant charge and benefits of the 7 stage smart charger .

What is the cheapest power bank for backpacking?

The cheapest power bank we have found for backpacking, the Miady is sold as a two-pack. During our tests, its overall performance was not as strong as some of the other battery packs we looked at, but it's hard to beat its price point.

Does a battery pack put out 5V?

Yes, it puts out 5V no matter what the main output voltage is set to, essentially turning the pack in to a 2-voltage source. There is an audio alarm that sounds when the battery is close to being empty. It sounds when the battery is 3% to 5% full and will sound until the battery shuts off.

How many volts can a battery pack charge?

The charger section of the battery pack has a DC/DC converter with a wide input range. This means that the pack can be charged from a wide variety of sources. The input voltage for charging can be as low as 5 volts and as high

as 24 volts.
