# Syria solar Panels

## Overview

---

Why are Syrians using solar panels?

Cut off from the power grid and with fuel costs soaring, Syrians in a poor, embattled enclave have turned en masse to solar panels to charge their phones and light their homes and tents. Solar panels covering rooftops, some of which have been damaged in government attacks, in Binnish, Syria.

Is putting solar panels on roofs a solution in Syria?

“The solution to the problem isn’t putting solar panels on roofs,” Syria’s interim Energy Minister Mohammad al-Bashir told The Associated Press. “It’s securing enough power for the families through our networks in Syria. This is what we’re trying to do.” Some of the efforts focus on simply repairing infrastructure destroyed in the war.

Where are solar panels located in Syria?

Solar panels, big and small, old and new, are seemingly everywhere in Idlib Province along Syria’s border with Turkey, rigged up in twos and threes on the roofs and balconies of apartment buildings, perched atop refugee tents and mounted near farms and factories on huge platforms that rotate to follow the sun across the sky.

Is there a solar revolution in Syria?

An unlikely solar revolution of sorts has taken off in an embattled, rebel-controlled pocket of northwestern Syria, where large numbers of people whose lives have been upended by the country’s 10-year-old civil war have embraced the sun’s energy simply because it is the cheapest source of electricity around.

What is Syria's Energy Plan?

The plan will look at Syria’s projected energy demand and determine how much of it can come from renewable sources.

What role does energy play in Syria's Recovery?

“Given the critical role of energy in Syria’s recovery, we have to rapidly address energy poverty and progressively accelerate the access to renewable energy,” Sudipto Mukerjee, UNDP’s resident representative in Syria, said in a statement announcing the plan.
