# The role of the energy storage box in Türkiye s charging piles

## Overview

---

Why is Türkiye a key player in energy storage?

As global investments in energy storage systems continue to grow, Türkiye has positioned itself as a key player, with two cell production facilities and nearly 100 lithium-ion battery production factories of various scales actively operating across the country.

What's happening in Türkiye's lithium ion battery sector?

Bank of lithium ion batteries at the University of California San Diego Center for Energy Research in La Jolla, California, U.S. (AFP Photo) Investments in Türkiye's battery sector surpassed \$1 billion this year, driven by incentives and regulations aimed at achieving an 80-gigawatt-hour storage target by 2030.

Will Türkiye's battery and storage power plants be approved next year?

However, Usta noted that despite draft regulations, the legal framework for battery and storage power plants is still evolving. The first approvals are expected next year. Türkiye's battery imports remained steady at around \$1.1 billion, similar to last year.

What are the advantages of EV charging in Turkey?

The high solar and wind energy potential might be another advantage of Turkey regarding EVs. By the implementation of smart charging infrastructure and EV-RES integration, the cost of EV charging from renewables can become lower in Turkey than the other countries.

How many battery plants are there in Türkiye?

With these new additions, the total number of battery production facilities in Türkiye will reach 11. However, Usta noted that despite draft regulations, the legal framework for battery and storage power plants is still evolving. The first approvals are expected next year.

How big is Turkey's battery industry?

Türkiye's battery imports remained steady at around \$1.1 billion, similar to last year. Usta forecasted that exports would rise from \$39 million to \$48 million by the end of the year. He also highlighted the success of the association's summit, which attracted international interest and further strengthened Türkiye's standing in the battery sector.
