# Togo solar Energy Storage System

## Overview

---

Construction of a utility-scale solar-plus-storage project is now underway in northern Togo. The 25 MW Dapong solar project will include 36,000 solar panels across 52 hectares, along with 36 MWh of battery energy storage. It is expected to serve about 145,000.

Construction of a utility-scale solar-plus-storage project is now underway in northern Togo. The 25 MW Dapong solar project will include 36,000 solar panels across 52 hectares, along with 36 MWh of battery energy storage. It is expected to serve about 145,000.

Togo has begun construction on a 25 MW solar plant with 36 MWh of battery storage in the country's north. China's TBEA International Engineering is leading the project, which is scheduled for completion within 13 months. An installation ceremony for the project took place last week Image: Togo's.

Togo is taking a significant leap forward in its energy transition by launching a 55 MW pilot project for battery storage. This ambitious initiative, backed by a €25 million loan from the French Development Agency (AFD) and the Global Energy Alliance for People and Planet (GEAPP), is set to.

The solar project is part of the Togo National Development Plan, with the objective of providing universal access to electricity by 2030. The Sheikh Mohamed Bin Zayed Solar PV Plant in Togo. (Togo First) - Togo is preparing to launch an ambitious 400-megawatt (MW) solar energy development project as part of its strategy to achieve universal access to electricity by 2030. Last week, a technical workshop was held in Lomé to design the competitive process for the project's implementation.

As part of the Regional Urgent Intervention Project in the Solar Energy Sector (RESPITE), a photovoltaic solar power plant is to be built in Dapaong in northern Togo. The project is the subject of an international call for tenders. After Blitta, a new photovoltaic solar power plant is to be built.

If you've been tracking renewable energy trends in West Africa, the Togo pumped storage project announcement is like discovering a hidden treasure map. This \$300 million initiative aims to tackle energy shortages while boosting grid stability – and honestly, it's about time someone addressed.
