## Overview

---

Who is TuNur Ltd?

TuNur Ltd is an independent renewable energy, transmission and green hydrogen developer at the epicentre of Europe and Africa TuNur is developing a series of renewable energy projects that will produce low-cost green electrons and molecules in Tunisia for export. Each export project consists of three components: 01. Generation 02. Transmission 03.

Does Tunisia have a car industry?

Automotive sales and services represent one of Tunisia's major economic sectors. Vehicles are not fully manufactured locally, but Tunisia does have a small car-assembly industry. The GOT utilizes a strict quota system that caps the number of vehicles allowed into the country annually.

How many charging stations are there in Tunisia?

So far, there are 60 charging station for electric vehicles in Tunisia. Effective January 2022, the GOT implemented a 50% customs duty reduction on hybrid cars and a full duty exemption on electric vehicles to encourage the expansion of the sector.

Are heavy trucks allowed in Tunisia?

As of 2012, all vehicles older than five years, including heavy trucks, have been prohibited entry. Tunisian customs applies a graduated tax on all vehicle imports that rises with vehicle age up to the five-year limit. The total number of passenger cars in circulation is around two million.

Is Tunisia a good place to buy a car?

The Tunisian market presents opportunities for mid-sized U.S. vehicles, including pickups and SUVs. Tunisian dealers express interest in representing U.S. auto manufacturers. There is local demand for larger vehicle assembly plants, mainly for heavy trucks (3.5+ tons), pickup trucks, and minibus vans,

which could attract foreign investors.

Who makes hybrid cars in Tunisia?

Both GM and Ford are present, though market share for U.S. cars remains under 5%. The market for hybrid powertrain vehicles is still undeveloped; however, many brands such as Toyota, Kia, Mercedes, Honda, BMW, Audi, and Hyundai started offering hybrid car models in Tunisia.
