

## A-Core Container

# Türkiye Sodium Ion Energy Storage Project

IP65/IP55 OUTDOOR CABINET

WATERPROOF OUTDOOR CABINET

42U/27U

OUTDOOR BATTERY CABINET

## Overview

---

Progresiva, a subsidiary of Kontrolmatik Technologies, is set to embark on Türkiye's largest grid-scale energy storage project in Tekirdağ. This groundbreaking facility will be the first of its kind in Türkiye, boasting a GWh capacity.

Progresiva, a subsidiary of Kontrolmatik Technologies, is set to embark on Türkiye's largest grid-scale energy storage project in Tekirdağ. This groundbreaking facility will be the first of its kind in Türkiye, boasting a GWh capacity.

Bank of lithium ion batteries at the University of California San Diego Center for Energy Research in La Jolla, California, U.S. (AFP Photo) Investments in Türkiye's battery sector surpassed \$1 billion this year, driven by incentives and regulations aimed at achieving an 80-gigawatt-hour storage.

Recognising the significance of storing energy from sustainable sources, the Regulation on Storage Activities in the Electricity Market (RSAEM), effective since 9 May 2021, outlines the principles governing storage activities. Subsequent legislative changes aim at promoting investments in energy.

Kesikli is an internationally recognized law firm that is regularly rated as one of the leading law firms in Turkey by the independent legal guide Legal500. Kesikli has made a name for itself as an international boutique law firm that exceeds its clients' various needs with a personalized touch.

Accordi to Embassy of the Republic of Turkey, Turkey has introduced a number of incentives and regulations to achieve its goal of 80 gigawatt-hours (GWh) of energy storage by 2030, while agreements for the energy sector to set up cell and battery factories have exceeded \$1 billion (TL 35 billion).

Progresiva, a subsidiary of Kontrolmatik Technologies, is set to embark on Türkiye's largest grid-scale energy storage project in Tekirdağ. This groundbreaking facility will be the first of its kind in Türkiye, boasting a GWh capacity. Moreover, it will be accompanied by the launch of a wind energy.

Türkiye is making significant strides toward its 2053 net-zero carbon emissions goal by ramping up investments in energy storage systems according to Türkiye daily. The Energy Market Regulatory Authority (EMRA) approved a 35-gigawatt-hour (GWh) capacity allocation for grid-scale storage projects.
