UK Energy Storage Project Construction Database

Overview

How has energy storage changed in the UK?

RenewableUK's 'EnergyPulse' energy storage report showed that the total pipeline of battery projects has increased from 50.3GW a year ago to 84.8GW, an increase of 68.6 per cent, or 34.5GW. Operational battery storage capacity has grown to 3.5GW, while the capacity of projects under construction has reached 3.8GW.

How many energy storage projects are there?

Currently there are 2469 energy storage projects tracked in the EnergyPulse database (including inactive projects, as of 18/11/2024), covering details such as project capacity, development status, developer and ownership, location and more. Daniel Sutherland, EnergyPulse Data Analyst.

Is energy storage a growth area?

Energy storage has become one of the most exciting and dynamic growth areas within the global energy sector. Updated monthly, this report includes both operational and pipeline Battery Storage projects in the UK with information on:.

Is the battery storage pipeline growing in the UK?

Overall though, the breakdown of the battery storage pipeline in the UK indicates a position of growth, with a large proportion of the pipeline capacity in early development, in planning and consented stages.

Who owns the energy storage project?

The project is owned by Quinbrook Infrastructure Partners and developed by Wirsol Energy; Hive Energy. For more details on the latest energy storage projects, buy the project profiles here. The gold standard of business intelligence.

Could energy storage save £10 billion a year?

The Department for Business, Energy & Industrial Strategy has said that technologies “such as electricity storage could save up to £10 billion per year by 2050 by reducing the amount of generation and network needed to decarbonise and create 24,000 jobs”. Which are the 5 biggest UK energy storage projects?
