Ukraine container energy storage

Overview

Why is Ukraine investing €140 million in energy storage?

The €140 million total investment aims to enhance power grid stability, bolstering Ukraine's energy security and independence. The project will be the biggest operational energy storage portfolio in Eastern Europe at the time of commissioning.

How big is Ukraine's gas storage?

The highest level of gas stock and its third part is done by non-resident customers Ukraine's vast storage facilities are not just an asset for the country itself, but rather for the entire continent. The storage system is the world's third biggest by capacity – behind only the United States and Russia – can store over 30 bcm.

What is the largest container terminal in Ukraine?

The Container Terminal Odesa (CTO) in the port is the largest container terminal in Ukraine. It has been operated by the Hamburg-based HHLA Group since 2001 and, in addition to containers, also handles bulk goods, general cargo and project cargo.

How long does it take to build a thermal power plant in Ukraine?

Constructions of this size normally take 12-15 months, but DTEK noted Ukraine's urgency for the project to commence before the autumn-winter season. The country is bracing for another wave of Russian attacks, with a recent strike on a thermal power plant in Kyiv Oblast cutting off electricity to part of the region on Sept. 8.
