Uzbekistan solar panel power

Overview

Between January and July 2025, solar panels installed on homes, businesses and infrastructure sites across Uzbekistan generated 875 mln kWh of electricity, according to the Ministry of Energy.

Between January and July 2025, solar panels installed on homes, businesses and infrastructure sites across Uzbekistan generated 875 mln kWh of electricity, according to the Ministry of Energy.

Solar power can play a role in meeting this demand, as the country has abundant solar resources and a strong potential for solar energy generation. The government of Uzbekistan has implemented several initiatives to promote the use of solar power, including the development of large-scale solar.

Uzbekistan is making significant strides in its transition to renewable energy, driven by a clear vision for a sustainable future and supported by robust government initiatives. This article will delve into the latest statistics on solar energy development in Uzbekistan, reviewing the key.

More than 35,000 households in Uzbekistan received state subsidies for exporting surplus electricity from rooftop solar systems between January and September, says the State Tax Committee, as participation in the Solar Home program accelerates nationwide. Image: Daniele La Rosa Messina/Unsplash.

More than 35,000 Uzbeks have received financial support from the state for generating electricity through solar panels, according to the State Tax Committee. Between January and September 2025, 35,284 individuals were granted a total of UZS 153.6bn (\$12.8mn) in subsidies from the state budget for.
