# What is the largest energy storage project in Bangladesh

## Overview

---

On April 3, 2023, Wuling Power Corporation Ltd., started the construction of its first integrated smart energy project in Bangladesh, a 55 MW rooftop PV power + 5 MW energy storage project. Can energy storage be used in Bangladesh?

Concluded in May 2023, the assignment assessed available energy storage technologies, evaluated the role of energy storage in the current grid conditions, identified potential storage locations, analysed energy storage requirements under variable renewable energy (VRE) integration, and developed a roadmap for energy storage in Bangladesh.

What are the benefits of solar projects in Bangladesh?

Large solar projects can provide clean power to densely populated areas, while solar mini grid projects can energise remote, off-grid areas. With good solar incentives and programs, the Bangladeshi government can stimulate renewable energy growth within the country.

What can be done about grid connected energy storage in Bangla-Desh?

Limited experience and knowledge of grid connected energy storage in Bangladesh. Early-stage pilot programmes such as the planned 2MW grid connected BESS funded by the Asian Development Bank (ADB) would further support capacity building and knowledge transfer. 3.3.

Which is the largest solar power plant in Bangladesh?

The Rays Power Infra 275-MW capacity solar plant in Sundarganj, Gaibandha, is currently the largest solar photovoltaic power plant in Bangladesh. It was completed in January 2023 and is connected to the national grid. The plant comprises over 500,000 individual solar modules spread over 600 acres of land.

What's in the Bangladesh Power Sector Roadmap?

The roadmap highlights specific use-cases for consideration in the Bangladesh power sector over three different future time horizons. It also includes a summary of indicative policy and regulation actions and interventions that may be considered to enable the deployment of energy storage within the defined time horizons.

What are Bangladesh's Solar and green energy goals?

Bangladesh has ambitious solar and green energy goals including building best solar systems in Bangladesh. The country plans to generate 4,100 MW of clean energy by 2030, consisting of 2,277 MW from solar, 1,000 MW from hydropower, and 597 MW from wind power.
