# What is the price of personal inverters in the United States

## Overview

---

The average U.S. homeowner spends \$2,000 on a solar inverter, but costs range from \$1,000 to \$3,000 depending on the model and the number of inverters. How much does a solar inverter cost?

The cost varies based on type and capacity, ranging from \$500 to \$10,000+.

2. Which solar inverter is best for home use?

Fronius Primo, SMA Sunny Boy, and Enphase IQ 7A are among the best options.

How much does a string inverter cost?

String inverters cost \$800 to \$2,500 on average. Most homes only require a single inverter, but you could need up to three if you have a larger-than-average residential solar energy system. String inverters work by connecting several solar panels, which send their electricity to a central point where the inverter converts the power.

How much does it cost to replace an inverter?

If the warranty for your inverter has expired, minor repairs can save cash and extend the inverter's life span. A replacement runs \$200 to \$500 plus the cost of the inverter. You'll want to replace your inverter if:

How much does a microinverter cost?

Microinverters cost an average of \$150 to \$300 each, but you'll need one for each solar panel in your system. They're installed on the underside of each panel and immediately convert electricity as soon as it's generated, helping increase efficiency by limiting energy loss. Microinverters are popular because they perform well in areas with shade.

Are solar inverters a good choice for your home?

Modern solar inverters for home come with enhanced efficiency, offering

higher conversion rates. More efficient inverters tend to be slightly more expensive but provide better energy output.
