

## A-Core Container

# What is the voltage difference of solar panels

**Deye Official Store**

**10 years  
warranty**

## Overview

---

Different solar panels have varying voltage ratings, typically ranging from 12V to 48V. 12V panels are often used for small solar setups because they are compatible with 12V battery systems, which are common in RVs, boats, and off-grid applications.
