Where are the 5G network base stations in Mali

Overview

How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

Which countries have the best 5G coverage?

The really big standout is India which seems to have blanketed the country in 5G coverage within just the last 2 years. This contrasts strongly with it's neighbours like Pakistan, Myanmar and even large parts (of mostly sparsely populated) China. Europe also has good coverage up until you reach Ukraine and Belarus and into Russia.

Is 5G commercially open?

Indeed, it allows to follow the progressive deployment of 5G in the world, with always a notion of quality of associated coverage. However, it should be noted that certain areas where 5G has been detected are not necessarily commercially open. Indeed, beforehand, technical tests can be carried out by operators and their subcontractors.

What is the GSMA 'roadmaps for 5G spectrum - sub-Saharan Africa' Report?

The GSMA's "Roadmaps for 5G Spectrum: Sub-Saharan Africa" report looks at the current mobile services and spectrum status. It also sets out a roadmap to help governments and regulators maximise the benefits of 5G in the region.

Which countries need 5G spectrum?

The report takes a closer look at 10 countries: Kenya, Nigeria, Rwanda, Ethiopia, South Africa, Benin, Cameroon, DRC, Côte d'Ivoire, and Senegal. For each country, the report looks at the need for 5G spectrum to be made

available, and the current status.

How are 5G measurements done?

Regarding the collection of 5G measurements, it is done in the same way as for the previous technologies by our App users, with the difference that these users must of course be equipped with mobile and SIM card both 5G compatible. These measurements are therefore carried out in real conditions, directly in the field.
