# Which company is the power dump energy

## Overview

---

“Dump Duke” wants St. Pete to replace Duke Energy with a municipally-owned utility company. Their goal is to get a commission to fund a feasibility study “by the end of 2025 to examine costs, viability, and renewable energy alternatives for our power supply,” according to the online petition.

“Dump Duke” wants St. Pete to replace Duke Energy with a municipally-owned utility company. Their goal is to get a commission to fund a feasibility study “by the end of 2025 to examine costs, viability, and renewable energy alternatives for our power supply,” according to the online petition.

Across the U.S., Duke Energy owns and operates a diverse mix of regulated power plants – including hydro, coal, nuclear, natural gas, solar and battery storage © Duke Energy Corporation. All Rights Reserved. Duke Energy's various mix of generation resources, include nuclear, coal-fired, oil- and.

Repurposing old and unused spaces for new and innovative purposes is a growing trend in sustainability and renewable energy initiatives. One such example is the proposal to transform a former landfill site into a solar farm in South Barrington, Illinois. This ambitious project aims to repurpose the.
